UPDATE

Cancer Conference Update

A Continuing Medical Education Audio Series

OVERVIEW OF ACTIVITY

Hematologic oncology and related blood disorders are some of the most rapidly evolving fields in all of medicine. Results presented at major conferences from a plethora of ongoing clinical trials lead to the continual emergence of new therapeutic agents and changes in the indications for existing treatments. In order to offer optimal patient care, the practicing hematologist-oncologist must be well informed of these advances. To bridge the gap between research and patient care, this issue of *Cancer Conference Update* uses one-on-one discussions with Drs Cheson, Talpaz, Anderson and Kahl about the integration of key data sets presented at the 2012 American Society of Hematology Annual Meeting into the practical management of a number of hematologic cancers and related blood disorders.

LEARNING OBJECTIVES

- Apply emerging clinical research data to the rational selection of treatment for patients with hematologic cancers.
- Evaluate the safety profiles and response outcomes observed in studies of next-generation proteasome inhibitors, immunomodulatory agents, histone deacetylase inhibitors, elotuzumab and other novel agents alone or in combination with approved systemic treatments for relapsed/refractory multiple myeloma.
- Appropriately incorporate ruxolitinib into the treatment of JAK2 mutation-positive or mutation-negative myelofibrosis, with consideration of dosing based on platelet counts.
- Integrate new therapeutic strategies into the best-practice management of Hodgkin lymphoma.
- Recall potentially practice-changing clinical research on the care of patients with newly diagnosed, nonhigh-risk acute promyelocytic leukemia.
- Develop an understanding of emerging efficacy and side-effect data with novel agents and combination regimens under evaluation for indolent and aggressive B-cell non-Hodgkin lymphomas.

ACCREDITATION STATEMENT

Research To Practice is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

CREDIT DESIGNATION STATEMENT

Research To Practice designates this enduring material for a maximum of 2.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

HOW TO USE THIS CME ACTIVITY

This CME activity contains an audio component. To receive credit, the participant should review the CME information, listen to the CDs, complete the Post-test with a score of 70% or better and fill out the Educational Assessment and Credit Form located in the back of this booklet or on our website at ResearchToPractice.com/CACU113/CME.

This activity is supported by educational grants from Genentech BioOncology/Biogen Idec, Incyte Corporation, Onyx Pharmaceuticals Inc and Seattle Genetics.

Last review date: May 2013; Release date: May 2013; Expiration date: May 2014

FACULTY INTERVIEWS

- 3 Bruce D Cheson, MD**
Professor of Medicine
Deputy Chief, Division of Hematology-Oncology
Head of Hematology
Georgetown University Hospital
Lombardi Comprehensive Cancer Center
Washington, DC

- 3 Moshe Talpaz, MD**
Alexander J Trotman Professor of Leukemia Research
Associate Director of Translational Research
UM Comprehensive Cancer Center
Associate Chief, Division of Hematology/Oncology
Director, Hematologic Malignancies
University of Michigan Medical Center
Ann Arbor, Michigan

- 4 Kenneth C Anderson, MD**
Kraft Family Professor of Medicine
Harvard Medical School
Director, Jerome Lipper Multiple Myeloma Center
Director, LeBow Institute for Myeloma Therapeutics
Dana-Farber Cancer Institute
Boston, Massachusetts

- 4 Brad S Kahl, MD**
Skoronski Chair of Lymphoma Research
Associate Professor
University of Wisconsin School of Medicine and Public Health
Associate Director for Clinical Research
UW Carbone Cancer Center
Madison, Wisconsin

7 EDUCATIONAL ASSESSMENT AND CREDIT FORM

This educational activity contains discussion of published and/or investigational uses of agents that are not indicated by the Food and Drug Administration. Research To Practice does not recommend the use of any agent outside of the labeled indications. Please refer to the official prescribing information for each product for discussion of approved indications, contraindications and warnings. The opinions expressed are those of the presenters and are not to be construed as those of the publisher or grantors.

If you would like to discontinue your complimentary subscription to *Cancer Conference Update*, please email us at Info@ResearchToPractice.com, call us at (800) 648-8654 or fax us at (305) 377-9998. Please include your full name and address, and we will remove you from the mailing list.

CONTENT VALIDATION AND DISCLOSURES

Research To Practice (RTP) is committed to providing its participants with high-quality, unbiased and state-of-the-art education. We assess potential conflicts of interest with faculty, planners and managers of CME activities. Real or apparent conflicts of interest are identified and resolved through a conflict of interest resolution process. In addition, all activity content is reviewed by both a member of the RTP scientific staff and an external, independent physician reviewer for fair balance, scientific objectivity of studies referenced and patient care recommendations.

FACULTY — The following faculty (and their spouses/partners) reported real or apparent conflicts of interest, which have been resolved through a conflict of interest resolution process: **Dr Cheson** — Advisory Committee: Celgene Corporation, Cephalon Inc, Gilead Sciences Inc, Mundipharma International Limited, Onyx Pharmaceuticals Inc, Pharmacyclics Inc, Sanofi; Consulting Agreements: Celgene Corporation, Cephalon Inc, Genentech BioOncology, Mundipharma International Limited. **Dr Talpaz** — Advisory Committee: Bristol-Myers Squibb Company, Novartis Pharmaceuticals Corporation, Pfizer Inc, Sanofi; Contracted Research: Abbott Laboratories, Bristol-Myers Squibb Company, Celgene Corporation, Incyte Corporation, Millennium: The Takeda Oncology Company, Novartis Pharmaceuticals Corporation, Sanofi; Speakers Bureau: Novartis Pharmaceuticals Corporation. **Dr Anderson** — Advisory Committee: Bristol-Myers Squibb Company, Celgene Corporation, Gilead Sciences Inc, Onyx Pharmaceuticals Inc, Sanofi; Other Remunerated Activities: Acetylon Pharmaceuticals Inc. **Dr Kahl** — Advisory Committee: Celgene Corporation, Cephalon Inc, Genentech BioOncology, Millennium: The Takeda Oncology Company, Roche Laboratories Inc; Contracted Research: Abbott Laboratories, Cephalon Inc, Genentech BioOncology.

EDITOR — Dr Love is president and CEO of Research To Practice, which receives funds in the form of educational grants to develop CME activities from the following commercial interests: AbbVie Inc, Algeta US, Allos Therapeutics, Amgen Inc, ArQule Inc, Astellas, Aveo Pharmaceuticals, Bayer HealthCare Pharmaceuticals, Bodesix Inc, Biogen Idec, Boehringer Ingelheim Pharmaceuticals Inc, Bristol-Myers Squibb Company, Celgene Corporation, Daiichi Sankyo Inc, Dendreon Corporation, Eisai Inc, EMD Serono Inc, Foundation Medicine Inc, Genentech BioOncology, Genomic Health Inc, Gilead Sciences Inc, Incyte Corporation, Lilly USA LLC, Medivation Inc, Merck, Millennium: The Takeda Oncology Company, Mundipharma International Limited, Novartis Pharmaceuticals Corporation, Onyx Pharmaceuticals Inc, Prometheus Laboratories Inc, Regeneron Pharmaceuticals, Sanofi, Seattle Genetics, Spectrum Pharmaceuticals Inc and Teva Oncology.

RESEARCH TO PRACTICE STAFF AND EXTERNAL REVIEWERS — The scientific staff and reviewers for Research To Practice have no real or apparent conflicts of interest to disclose.

Have Questions or Cases You Would Like Us to Pose to the Faculty?

Submit them to us via Facebook or Twitter
and we will do our best to get them answered for you

INDOLENT B-CELL LYMPHOMAS, HODGKIN LYMPHOMA AND ANAPLASTIC LARGE CELL LYMPHOMA — Bruce D Cheson, MD

Tracks 1-12

- 1 Abstract 901: Final results of a Phase II study of lenalidomide and rituximab (R²) for treatment-naïve indolent lymphoma
- 2 Results of CALGB-50401: A randomized Phase II study of lenalidomide with or without rituximab for recurrent follicular lymphoma (FL)
- 3 Abstract 793: Safety and efficacy of pidilizumab (CT-011), a humanized anti-PD-1 monoclonal antibody, in combination with rituximab in relapsed FL
- 4 Abstract 191: Activity and tolerability of the selective phosphatidylinositol 3-kinase-delta inhibitor idelalisib (GS-1101) with rituximab and/or bendamustine in relapsed or refractory chronic lymphocytic leukemia (CLL)
- 5 Abstract 717: Chimeric antigen receptor T cells directed against CD19 induce durable responses and transient cytokine release syndrome in relapsed/refractory CLL and acute lymphoblastic leukemia (ALL)
- 6 Abstract 189: Profound activity of the Bruton tyrosine kinase (BTK) inhibitor ibrutinib in treatment-naïve and relapsed or refractory CLL or small lymphocytic lymphoma (SLL)
- 7 Abstract 187: Activity and tolerability of ibrutinib/rituximab in high-risk CLL
- 8 Abstract 720: Results of a Phase II study of ofatumumab and lenalidomide in relapsed CLL
- 9 Abstract 798: Front-line therapy with brentuximab vedotin combined with ABVD or AVD in newly diagnosed advanced-stage Hodgkin lymphoma (HL)
- 10 Brentuximab vedotin in the treatment of HL and anaplastic large cell lymphoma (ALCL)
- 11 Abstract 547: Results of the UK NCRI RAPID trial of involved field radiation therapy versus no further treatment in patients with clinical Stages IA and IIA HL and a “negative” PET scan after 3 cycles of ABVD
- 12 Use of involved field radiation therapy in clinical practice

MYELOFIBROSIS, ACUTE MYELOID LEUKEMIA, CHRONIC MYELOGENOUS LEUKEMIA, ACUTE LYMPHOBLASTIC LEUKEMIA AND ACUTE PROMYELOCYTIC LEUKEMIA — Moshe Talpaz, MD

Tracks 1-13

- 1 Abstract 800: Long-term outcome of ruxolitinib treatment in myelofibrosis (MF) — Durable reductions in spleen volume, improvements in quality of life and overall survival advantage in the COMFORT-I study
- 2 Lack of correlation between JAK2 mutation status and response and survival outcomes with ruxolitinib
- 3 Abstract 801: Long-term safety, efficacy and survival findings from the COMFORT-II study comparing ruxolitinib to best available therapy for the treatment of MF
- 4 Abstracts 176, 177: Efficacy, hematologic effects and dose of ruxolitinib in patients with MF who have low initial platelet counts (50 to 100 x 10⁹/L)
- 5 Ruxolitinib treatment for patients with MF who have platelet counts lower than 50 x 10⁹/L
- 6 Abstract 45: Homoharringtonine (omacetaxine mepesuccinate)-based induction regimens for de novo acute myeloid leukemia (AML) — Results of a Phase III study
- 7 Abstracts 48, 673: Final results of a Phase II study of quizartinib in patients with FLT3-ITD-positive or negative relapsed/refractory AML
- 8 Abstract 163: PACE — 12-month follow-up of a Phase II trial of ponatinib in patients with chronic myeloid leukemia (CML) and Philadelphia chromosome-positive ALL resistant or intolerant to dasatinib or nilotinib or with the T315I BCR-ABL mutation

MYELOFIBROSIS, ACUTE MYELOID LEUKEMIA, CHRONIC MYELOGENOUS LEUKEMIA, ACUTE LYMPHOBLASTIC LEUKEMIA AND ACUTE PROMYELOCYTIC LEUKEMIA — Dr Talpaz

CONTINUED

- Abstracts 3779, 3785: Bosutinib treatment for chronic-phase CML after intolerance or resistance to imatinib, dasatinib and/or nilotinib
- Abstracts 2787, 3753: Subcutaneous omacetaxine mepesuccinate in chronic-, accelerated- and blast-phase CML
- Abstract 670: Anti-CD19 BiTE blinatumomab induces high complete remission rates and prolongs overall survival in patients with relapsed/refractory B-precursor ALL
- Abstract 2612: Weekly inotuzumab ozogamicin in patients with relapsed or refractory CD22-positive ALL
- Abstract 6: ATRA and arsenic trioxide versus ATRA and idarubicin for newly diagnosed, nonhigh-risk acute promyelocytic leukemia (APL) — Results of the Phase III Intergroup APL0406 study

MULTIPLE MYELOMA — Kenneth C Anderson, MD

Tracks 1-13

- Abstract LBA-6: Survival advantage with the second-generation immunomodulatory drug (IMiD) pomalidomide in combination with low-dose dexamethasone in relapsed/refractory multiple myeloma (MM) — A Phase III study
- Abstract 77: Clarithromycin, pomalidomide and dexamethasone (ClPD) in relapsed/refractory MM
- Abstracts 931, 194: Cereblon as a predictive biomarker for IMiDs in MM
- Abstract 74: Results of a multicenter Phase I/II study of carfilzomib, pomalidomide and dexamethasone in relapsed/refractory MM
- Abstract 732: Results of a Phase II clinical and correlative study of carfilzomib, lenalidomide and dexamethasone in newly diagnosed MM
- Abstracts 333, 445, 730: Other carfilzomib-based combination regimens as induction therapy for transplant-eligible and ineligible patients with MM
- Abstract 947: A Phase II study of infusional carfilzomib in relapsed or refractory MM
- Use of low-dose dexamethasone and hydration in conjunction with carfilzomib to maintain a favorable therapeutic index
- Abstract 332: A Phase I/II study of weekly MLN9708 (ixazomib), an investigational oral proteasome inhibitor, in combination with lenalidomide and dexamethasone in previously untreated MM
- Current status of the clinical development of ixazomib
- Abstract 73: Results of a Phase I/II dose-escalation study of daratumumab, a CD38 monoclonal antibody, in relapsed/refractory MM
- Abstract 202: Updated results of a Phase II study of elotuzumab, lenalidomide and low-dose dexamethasone in relapsed/refractory MM
- Rationale for the addition of HDAC inhibitors to standard triplet induction regimens in MM

AGGRESSIVE B-CELL LYMPHOMAS — Brad S Kahl, MD

Tracks 1-11

- Abstract 689: Efficacy and tolerability of lenalidomide with R-CHOP (R²-CHOP) as initial treatment for aggressive B-cell lymphomas in a Phase II study
- Proposed ECOG study of R²-CHOP versus R-CHOP in untreated diffuse large B-cell lymphoma (DLBCL) with correlational analyses of cell of origin and response
- Abstract 903: The Phase II REAL07 study of R²-CHOP versus R-CHOP in elderly patients with untreated DLBCL

CONTINUED

- 4 Abstract 686: Preferential activity of the oral BTK inhibitor ibrutinib in the ABC subtype of relapsed/refractory de novo DLBCL — Interim results of a Phase II study
- 5 Durability of response and toxicity of ibrutinib in mantle-cell lymphoma (MCL) and CLL/SLL
- 6 Abstract 902: Results of the randomized BRIGHT study evaluating BR, R-CVP and R-CHOP as first-line treatment in advanced indolent non-Hodgkin lymphoma or MCL
- 7 Abstract 153: Mature results of the ECOG-E1405 study evaluating bortezomib/rituximab-CVAD with maintenance rituximab in previously untreated MCL
- 8 Optimal duration of maintenance rituximab in MCL
- 9 Abstract 904: Interim Phase II study results of ibrutinib in relapsed or refractory MCL
- 10 Abstract 60: Concurrent multiagent chemotherapy and brentuximab vedotin as front-line treatment for ALCL and other CD30-positive mature T-cell and NK-cell lymphomas
- 11 Ongoing Phase III study of brentuximab vedotin and CHP versus CHOP as front-line treatment for CD30-positive mature T-cell lymphomas

QUESTIONS (PLEASE CIRCLE ANSWER):

- Final results from a Phase II study of R² (lenalidomide/rituximab) demonstrated that this combination produces high complete response rates and durable remissions in patients with FL.**
 - True
 - False
- Patients with MF must have a JAK2 mutation to respond to treatment with ruxolitinib.**
 - True
 - False
- Which of the following is an approved treatment for CML?**
 - Omacetaxine
 - Bosutinib
 - Ponatinib
 - All of the above
- Carfilzomib is approved for use as single-agent therapy for patients with MM refractory to bortezomib and an IMiD.**
 - True
 - False
- A Phase I/II trial of carfilzomib and pomalidomide with dexamethasone in patients with relapsed/refractory MM demonstrated an overall response rate of _____.**
 - 30%
 - 50%
 - 70%
- A Phase III study of homoharringtonine-based induction regimens for patients with de novo AML demonstrated that these regimens are associated with higher response rates and improved survival compared to an anthracycline and cytarabine regimen.**
 - True
 - False
- The side effects associated with quizartinib when used to treat FLT3-ITD-positive or negative relapsed/refractory AML include:**
 - Gastrointestinal toxicities
 - QT prolongation
 - Myelosuppression
 - All of the above
- A study on the long-term outcomes of ruxolitinib in patients with MF on the COMFORT-I study demonstrated _____.**
 - A continued survival advantage
 - Sustained reductions in spleen volume
 - Continued improvement in symptoms and quality of life
 - All of the above
- High cereblon protein expression correlates with response in patients with MM treated with lenalidomide.**
 - True
 - False
- A study evaluating single-agent ibrutinib in treatment-naïve and relapsed/refractory CLL or SLL reported high response rates for _____.**
 - Treatment-naïve patients
 - Patients with relapsed/refractory disease
 - Patients with high-risk disease (those with deletion 17p)
 - All of the above

Research To Practice is committed to providing valuable continuing education for oncology clinicians, and your input is critical to helping us achieve this important goal. Please take the time to assess the activity you just completed, with the assurance that your answers and suggestions are strictly confidential.

PART 1 — Please tell us about your experience with this educational activity

How would you characterize your level of knowledge on the following topics?

4 = Excellent 3 = Good 2 = Adequate 1 = Suboptimal

	BEFORE	AFTER
Clinical trial results and ongoing studies of R ² for indolent lymphomas and of R ² -CHOP for aggressive lymphomas	4 3 2 1	4 3 2 1
Lack of correlation between JAK2 mutation status and response and survival outcomes with the JAK2 inhibitor ruxolitinib in MF	4 3 2 1	4 3 2 1
Use of low-dose dexamethasone and hydration in conjunction with carfilzomib to maintain a favorable therapeutic index	4 3 2 1	4 3 2 1
Survival advantage with pomalidomide in combination with low-dose dexamethasone in relapsed/refractory MM	4 3 2 1	4 3 2 1
Ongoing Phase III study of brentuximab vedotin and CHP versus CHOP as front-line treatment for CD30-positive mature T-cell lymphomas	4 3 2 1	4 3 2 1
Results of the Phase III Intergroup APL0406 study of ATRA and arsenic trioxide versus ATRA and idarubicin for newly diagnosed, nonhigh-risk APL	4 3 2 1	4 3 2 1

Was the activity evidence based, fair, balanced and free from commercial bias?

Yes No If no, please explain:

Please identify how you will change your practice as a result of completing this activity (select all that apply).

This activity validated my current practice Create/revise protocols, policies and/or procedures Change the management and/or treatment of my patients
 Other (please explain):

If you intend to implement any changes in your practice, please provide 1 or more examples:

.....

The content of this activity matched my current (or potential) scope of practice.

Yes No If no, please explain:

Please respond to the following learning objectives (LOs) by circling the appropriate selection:

4 = Yes 3 = Will consider 2 = No 1 = Already doing N/M = LO not met N/A = Not applicable

As a result of this activity, I will be able to:

- Apply emerging clinical research data to the rational selection of treatment for patients with hematologic cancers. 4 3 2 1 N/M N/A
- Evaluate the safety profiles and response outcomes observed in studies of next-generation proteasome inhibitors, immunomodulatory agents, histone deacetylase inhibitors, elotuzumab and other novel agents alone or in combination with approved systemic treatments for relapsed/refractory multiple myeloma. 4 3 2 1 N/M N/A
- Appropriately incorporate ruxolitinib into the treatment of JAK2 mutation-positive or mutation-negative myelofibrosis, with consideration of dosing based on platelet counts. 4 3 2 1 N/M N/A
- Integrate new therapeutic strategies into the best-practice management of Hodgkin lymphoma. 4 3 2 1 N/M N/A
- Recall potentially practice-changing clinical research on the care of patients with newly diagnosed, nonhigh-risk acute promyelocytic leukemia. 4 3 2 1 N/M N/A
- Develop an understanding of emerging efficacy and side-effect data with novel agents and combination regimens under evaluation for indolent and aggressive B-cell non-Hodgkin lymphomas. 4 3 2 1 N/M N/A

EDUCATIONAL ASSESSMENT AND CREDIT FORM (continued)

Please describe any clinical situations that you find difficult to manage or resolve that you would like to see addressed in future educational activities:

Would you recommend this activity to a colleague?

Yes No If no, please explain:

Additional comments about this activity:

As part of our ongoing, continuous quality-improvement effort, we conduct postactivity follow-up surveys to assess the impact of our educational interventions on professional practice. Please indicate your willingness to participate in such a survey.

Yes, I am willing to participate in a follow-up survey.
 No, I am not willing to participate in a follow-up survey.

PART 2 — Please tell us about the faculty and editor for this educational activity
