

POST-TEST

Investigator Perspectives on the Prevalence and Clinical Implications of Inaccurate or Misclassified Lymphoma Diagnoses in Community Oncology Practice

QUESTIONS (PLEASE CIRCLE ANSWER):

1. The majority of patients with del(17p) CLL _____.

 - Present up front with the 17p deletion
 - Acquire the 17p deletion over the course of their disease
2. Which of the following categories reflects the mechanism of action of venetoclax?

 - Antibody-drug conjugate
 - Anti-PD-1/PD-L1 antibody
 - Bcl-2 inhibitor
 - PI3K inhibitor
3. Treatment with _____ for patients with CLL can result in high rates of MRD negativity, which typically correlates with longer progression-free survival, time to next treatment and longer durations of remission.

 - Ibrutinib
 - Venetoclax
 - Both a and b
 - Neither a nor b
4. The Phase III ECHOLON-1 trial evaluating brentuximab vedotin with doxorubicin, vinblastine and dacarbazine versus bleomycin with doxorubicin, vinblastine and dacarbazine as front-line therapy for patients with previously untreated Stage III or IV HL demonstrated superior _____ for patients who received the brentuximab vedotin-based combination.

 - Progression-free survival
 - Overall survival
 - Both a and b
 - Neither a nor b
5. Hospitalization for the purpose of monitoring for TLS is required for all patients starting therapy with venetoclax.

 - True
 - False
6. A study published by Bartlett and colleagues evaluating brentuximab vedotin monotherapy in patients with DLBCL reported response rates of 30% to 40% for patients with CD30-undetectable disease.

 - True
 - False
7. Venetoclax is active in patients with _____.

 - CLL with 17p deletion
 - CLL without 17p deletion
 - Both a and b
 - Neither a nor b
8. A publication by Zinzani and colleagues in *Blood* stated that pembrolizumab monotherapy demonstrated activity in patients with primary mediastinal large B-cell lymphoma.

 - True
 - False
9. Technical issues with core needle biopsies that can lead to inaccurate diagnosis include _____.

 - Crush artifact
 - Edge effect
 - Limited amount of tissue
 - All of the above
 - Both a and b
 - Both a and c
10. Which of the following lymphomas exhibits constant expression of the CD30 antigen?

 - Anaplastic large cell lymphoma
 - DLBCL
 - HL
 - PTCL
